

Basic Stair Construction

TinyTIMBERS manufactures quality solid wood, never finger-jointed, square stair components typically used in Post-to-Post stair construction with straight treads. Returned treads & Over-the-Post systems are also available.

Post-to-Post Stair System

Consist of a rail system that terminates into each post, typical of Mission, Craftsman and other simple styles.

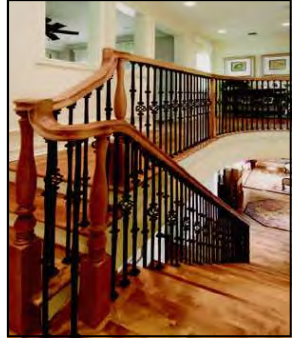

Over-the-Post stair systems

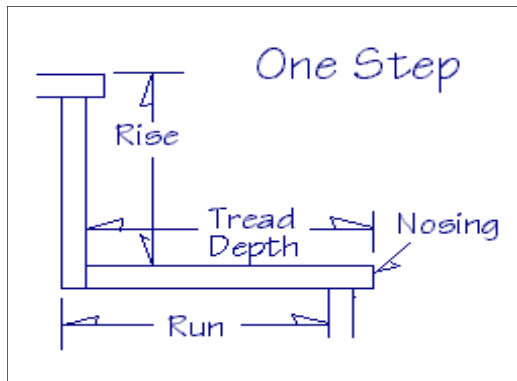

Consists of Rails installed over the newel posts, common in Victorian and other elaborate styles.

Over-the-Post construction can include eased components, turnouts, volutes, gooseneck and other turned fittings.

TinyTIMBERS distributes the full line of Coffman Stair Parts. Please contact us for a complimentary Coffman Stair Parts Buying Guide & current price quote.

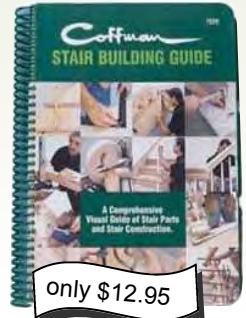

Stair construction can be very complex. Illustrations reflect only a small sample of components that comprise a stair system and are not intended to represent a particular installation.

COFFMAN STAIR BUILDING GUIDE

This instruction manual is the first comprehensive visual book on stair building. The 14 chapters contain over 475 black and white photographs with detailed step-by-step instructions, illustrations and helpful reference tables.

Only \$12.95

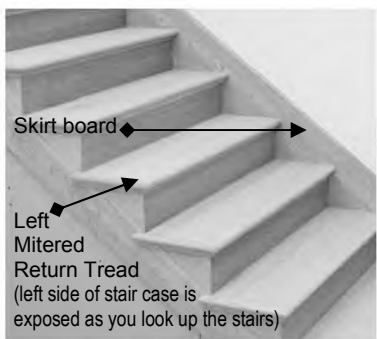

Always check your local building codes for required height and baluster spacing prior to planning and ordering your stair system.

Basic Types of Stair Construction

OPEN STAIRWAY

Open stairways have the treads and risers exposed from one or both side views of the stairs. Special Mitered Return Treads or an applied returned nosing are typically used.

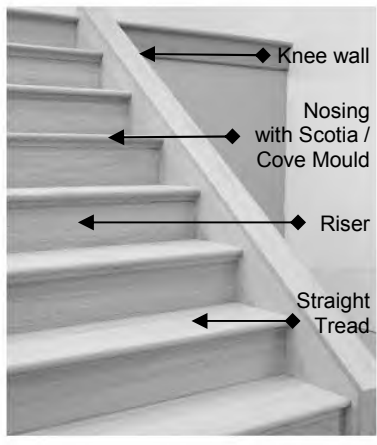

Balusters in an open stair will be installed directly into the treads of the stair.

CLOSED STAIRWAY

Closed stairways may use a knee, curb wall or full wall on both sides to enclose the stair body. Treads and risers are hidden from the side view.

Balusters used in a knee wall system will be installed into the cap of the knee wall or into shoe rail that is installed on top of the knee wall.

Stair Treads & Risers

STAIR RISERS - KILN DRIED SOLID (Alternate Species & Custom Sizes Available - Please Call for Prices)
