Memphis, TN 38109
**SAFETY STATEMENT**

**STORAGE AND DISPOSAL**

**STORAGE:**
Store in a secure, well-ventilated area protected from extreme temperatures. Do not transfer to unmarked containers. Keep container closed when not in use.

**DISPOSAL:**
If Empty: Do not reuse this container. Place in trash or offer for recycling if available.
If Partially Filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down an indoor or outdoor drain.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER**
Harmful or fatal if swallowed. Contains petroleum distillates. Avoid frequent or prolonged contact with skin, eyes, or clothing. Use only in a well-ventilated area. Avoid breathing spray mist.

**FIRST AID**
• Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
• Call a poison control center or doctor for treatment advice.

**IF ON SKIN OR CLOTHING:**
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15 – 20 minutes.
• Call a Poison Control Center or doctor for further treatment advice.

**HOT LINE NUMBER**
In case of emergency, call Chemtrec toll free at 800-424-9300. Have the product container or label with you when calling a poison control center or doctor or going for treatment.

**KEEP OUT OF REACH OF CHILDREN**

**ENVIRONMENTAL HAZARDS**
This product is toxic to fish. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters.

**PHYSICAL OR CHEMICAL HAZARDS**
Do not store or use near heat or open flame.

**SWEDISH WOOD OIL**

Swedish Wood Oil is a heavy duty, transparent treatment designed especially for protecting new "pressure-treated" wood. It does not form a film, and will never crack or peel.

Treated lumber (often green in color) is often prone to rapid moisture gains and losses that cause warping and splitting in many wood species.

Swedish Wood Oil is a water repellent wood stabilizer that beautifully highlights wood tones. It retards cupping, warping and splitting and generally minimizes physical deterioration caused by dimensional instability resulting from water absorption and extreme humidity changes.

Swedish Wood Oil treatment also helps reduce nail corrosion and popping.

Swedish Wood Oil is a wood protector that is intended for use on wood products where decay protection is not needed or is already provided by an earlier treatment.

**DIRECTIONS FOR USE**
Apply by spray, brush or roller. One moderate coat is sufficient. Surfaces should be clean and free of all loose debris. Apply to dry wood for maximum penetration and fastest drying. Do not over apply.

1. Swedish Wood Oil penetrates into the wood with only a small portion evaporating. Do not apply to painted or otherwise sealed or highly dense surfaces. If in doubt apply to a small test area. If the wood absorbs the treatment readily, it is suitable for use.
2. Swedish Wood Oil does not "DRY" in the conventional sense. It cures into the wood. Blot up any excess Swedish Wood Oil left unabsorbed on the surface.
3. Coverage 250-300 sq. ft./gallon, depending on surface condition and wood porosity.
4. Application temperature: Apply above 50°F. Hot weather promotes a faster cure time. Below 65°F, Swedish Wood Oil may become too viscous to spray.
5. Swedish Wood Oil softens asphalt – avoid contact.
6. Do not apply if rain is expected within 36 hours.
7. Avoid open flame during application and until the oil has thoroughly penetrated the treated surface.
8. Any subsequent coating applied over Swedish Wood Oil must be tested on a remote area to verify compatibility before application. Swedish Wood Oil's highly water repellent system will repel latex coatings and may not be compatible with some oil or alkyd coatings. Do NOT tint Swedish Wood Oil.
9. Until Swedish Wood Oil has thoroughly cured, treated area may be slippery.
10. Swedish Wood Oil may be applied to newly constructed pressure-treated decks that are thoroughly dry. Use only enough Swedish Wood Oil to be readily absorbed.

**CLEAN UP:**
Use detergent and water on fresh Swedish Wood Oil coated brushes etc. If it has had time to cure, mineral spirits or paint thinner may be used for clean up.

**MEETS ALL STATE VOC REQUIREMENTS**

**Volatile Organic Compounds** < 350 gm/liter
**VOS (Excluding water)** < 0.35 Kg/liter
